Subject: Bridgeton Landfill

Dear Administrator Brooks,

My name is Samantha Roberts, and I live 9.4 miles from the Bridgeton landfill. I purchased my modest property at 3725 Brown road in June of 2012. We immediately started a family and our son was born in April of 2013. We love our house, large yard, neighbors, community, etc. I work in O'Fallon MO, so I drive very near to the landfill daily. We shop in Bridgeton, have friends in Bridgeton and pass through Bridgeton almost daily. Aside from the smell, which can only be described as utterly overwhelming, I am scared of my exposure as well as my infant son's exposure to whatever is being emitted from there.

We have started shopping elsewhere, (we turn off our heat and air conditioning and roll up all of our windows when we pass through anywhere near (within 5 miles) the landfill.

Recently I've even started smelling the toxicity in my own yard, remember I am almost 10 miles away! I am terrified to open my windows this spring, for fear my house will be filled with the toxic smell of burning garbage. Let alone the smell, I'm sure we're all also being exposed to radiation as the fire is smoldering next to a nuclear waste site - unbelievable really. Something needs to be done, shut the place down, help, help, help!

I need your honest opinion, is my family safe? Should I immediately sell my house and move as far away from this place as possible? Is anyone looking out for our well being? If it were your family, your son, your grandson, your nephew - would you tell them to head for the hills? Would you tell them to pack it up and run as fast as they could? My gut tells me to get the heck out of here, to call the bank and tell them I need out of this!! I am terrified that my husband and I are exposing our son to what can only be considered toxic nuclear gasses. Please Administrator Brooks - tell me what you would do.

✓ I can be reached at Samrybr@gmail.com or at 330-990-4128 . You can also reply to this email - it is my work email address.

Your honest response would be much appreciated.

Thank you,
